Muhammed Rabah M

Python Full Stack Developer
rabahmuhammedm@gmail.com | +91-8606559112 | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Python Developer with hands-on experience building and maintaining production-grade backend systems using FastAPI and Django. Skilled in asynchronous Python, REST API development, Redis-based caching, relational and NoSQL databases, and backend performance optimization. Strong background in full-stack development (Django, React.js) with a proven track record of debugging complex distributed systems, improving application performance, and delivering reliable production solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS
Backend: FastAPI, Django, Django REST Framework (DRF), ORM, REST API Development, JWT Authentication
Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, Query Optimization, Caching Strategies
Testing & Debugging: Python Logging, Debugging, API Testing, Error Handling
Frontend: React.js, Next.js, Redux, JavaScript, Tailwind CSS, Bootstrap
DevOps & Tools: Docker, Docker Compose, CI/CD, Git, AWS (EC2), Postman, NGINX

PROFESSIONAL EXPERIENCE

Junior Backend Developer
Authority Entrepreneurs | September 2025 – June 2026

- Developed and maintained backend applications using Python, Django, and Django REST Framework (DRF), designing scalable REST APIs for web applications and third-party integrations.
- Integrated GoHighLevel APIs to automate CRM workflows, streamline business processes, and ensure reliable synchronization of customer and operational data.
- Designed and implemented webhook-driven workflows to process real-time events and enable seamless communication between internal systems and external services.
- Built AI-powered backend features by integrating Claude and other AI services, supporting chatbot functionality and intelligent workflow automation.
- Implemented asynchronous background task processing using Celery and Redis to efficiently handle scheduled jobs, webhook processing, and other long-running operations.
- Developed metrics and analytics dashboards that provide real-time visibility into CRM performance and operational metrics.
- Optimized PostgreSQL database queries and backend logic to improve application performance, data consistency, and system reliability.

PROJECTS

Fixngo: Home Service Booking Platform GitHub

Fixngo is a home service booking platform designed to connect customers with service professionals efficiently. It offers seamless booking, secure payments, and real-time communication to enhance the user experience.

- Developed a scalable project in Django with a well-structured codebase, ensuring clear separation of concerns and maintainability.
- Built backend functionalities with Python and Django, integrating **JWT** for secure authentication.
- Created robust APIs using **Django REST Framework** and ensured functionality through testing with **Postman**.
- Created dynamic user interfaces using **React** and **Redux**, effectively managing state and enhancing styling with **Tailwind CSS**.
- Utilized **PostgreSQL** and **ORM** for efficient data management and integrated **Paypal** for secure payments.
- Incorporated **WebSocket** and **Django Channels** into the project to enable real-time communication features such as personal chat and live updates.
- Leveraged **Redis** for caching and optimizing database queries to enhance application performance.

Electro: Gadgets E-Commerce Platform GitHub

Electro is a modern e-commerce platform specializing in gadgets and electronics, offering a seamless shopping experience, secure payments, and efficient inventory management. Customers can browse, purchase, and track orders, while admins manage products and sales through a comprehensive dashboard

- Developed a comprehensive monolithic application using the **Django** framework for backend operations
- Leveraged **PostgreSQL** and **ORM** for robust data management, ensuring data integrity and efficient retrieval.
- Integrated **Paypal** for secure and efficient payment processing.
- Developed responsive frontend interfaces using **HTML**, **CSS**, **JavaScript**, and **Bootstrap**, optimizing usability and visual appeal.
- Deployed on **AWS EC2** with **NGINX** for efficient load balancing and serving of the application.

Education

Brototype, Bootcamp - Calicut, India 2024 – 2025

- Completed a 30-week intensive full-stack web development bootcamp.
- Attended weekly performance reviews led by seasoned software developers.
- Developed two full-scale projects covering application development, prototyping, database design, and API documentation.
- Mentored newcomers in development, offering technical support and communication training.

Bachelor of Commerce (B.Com), Kannur University - Kerala, India. 2020 – 2023
